EDUCATION

Visvesvaraya National Institute of Technology (VNIT)
Computer Science and Engineering - CGPA - 6.17

11 2022 – 06 2026
Nagpur, Maharashtra

Prince Uch Madhyamik Vidyalaya
PCM - Percentage - 88.83%

2021
Sikar, Rajasthan

COURSEWORK / SKILLS

- Data Structures & Algorithms
- Operating Systems
- Computer Vision
- Network Security
- Database Management System (DBMS)
- Machine Learning
- OOPS Concept
- Web Development

PROJECTS

Multiagent Website Development System | Python, CrewAI, Flask, MongoDB 08 2025

- Built a multi-agent system with three specialized AI agents (Requirements Analyst, Backend Developer, Frontend Developer) using the CrewAI framework to automate website development, significantly reducing manual effort and time.
- Engineered a Flask-MongoDB backend generator that automatically creates production-ready APIs, models, routes, and documentation by parsing project requirements.
- Developed a frontend agent to build responsive UIs with vanilla HTML, CSS, and JavaScript that seamlessly integrated with the backend APIs, implementing mobile-first designs and WCAG accessibility standards.

Digital Agency Website 🗄 | Next JS, Mongo DB, Typescript 04 2025

- Built a full-stack Digital Agency Management Platform using Next.js, TypeScript, MongoDB, and Tailwind CSS to streamline project tracking, team collaboration, service offerings, and client communication
- Integrated role-based authentication and admin dashboard with NextAuth, enabling CRUD operations for projects, services, testimonials, employees, clients, and real-time contact submissions with secure access control.
- Implemented seamless meeting scheduling via Cal.com embed, and designed responsive UI with dark-themed gradient aesthetics, enhancing user experience and boosting engagement.

Distributed Notification Delivery System | C++ RabbitMQ MySQL 04 2024

- Engineered a **high-performance, fault-tolerant, event-driven** system for multi-channel notifications using modern C++, leveraging **AMQP-CPP** for **asynchronous** delivery, idempotent retries, and dead-letter queueing with **RabbitMQ**.
- Implemented **scalable, multi-threaded** worker consumers with exponential **backoff policies**, utilizing C++ concurrency primitives (`std::thread`, `std::mutex`) to demonstrate advanced system design and reliability.
- Designed low-latency **REST APIs** with Boost.Beast and persisted data in **MySQL** using the **ODB ORM**, ensuring transactional durability, **real-time** status tracking, and a complete audit trail at scale.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript, SQL, MongoDB

Developer Tools: VS Code, IntelliJ Idea Ultimate, Jupyter Notebook, Docker

Technologies/Frameworks: Linux, GitHub, ReactJS, NodeJS, ExpressJS, Git, Mongo

POSITION OF RESPONSIBILITY

AXIS'25

2025

Event Manager

Nagpur

- Planned, organized, and executed events from conception to completion, ensuring smooth operations.
- Oversaw event promotion, on-site management, and post-event evaluation to maximize success.
